West Wits Mining Limited
(ASX: WWI)

“Transforming world class mineral resources into Gold”

Investor Presentation
JUNE 2018
This presentation may contain certain forward-looking statements that have been based on current expectations about future acts, events and circumstances. These forward-looking statements are, however, subject to risks, uncertainties and assumptions that could cause those acts, events and circumstances to differ materially from the expectations described in such forward-looking statements.

These factors include, among other things, commercial and other risks associated with estimation of resources, the meeting of objectives and other investment considerations, as well as other matters not yet known to the Company or not currently considered material by the Company.

West Wits accepts no responsibility to update any person regarding any error or omission or change in the information in this presentation or any other information made available to a person or any obligation to furnish the person with further information.

Competent Person
The information in this announcement that relates to Exploration Results from South Africa is based on information compiled by Hermanus Berhardus Swart, a Competent Person who is a Professional Natural Scientist registered with South African Council for Natural Scientific Professions accredited (No. 400101/00) and a Fellow of the Geological Society of South Africa, each of which is a “Recognised Professional Organisation” (RPO) that is included in a list that is posted on the ASX website from time to time. Hermanus Berhardus Swart is employed by Dunrose Trading 186 (PTY) Ltd trading as Shango Solutions, which provides services as geological consultants to the Company. Hermanus Berhardus Swart has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Hermanus Berhardus Swart consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.

Dr Andrew J. Tunks MAIG
The peer review of the South African results was undertaken by Dr. Andrew Tunks and represents an accurate representation of the available data. Dr. Tunks (Member Australian Institute Geoscientists) is a consultant to the Company and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’. Dr Tunks consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
DRILLING UNDERWAY

Premier conglomerate hosted gold projects

**SOUTH AFRICA**
Witwatersrand Basin Project (WBP)

Note: WWI has reduced its stake in the Derewo project in West Papua, Indonesia and funding commitments are currently minimal.
WWI’s strategy to create value...

Creating Shareholder Value

- Optimize capital expenditure
- Identify exploration targets
- Obtain regulatory approvals
- Profitable gold production
- Deliver exploration success

#### 12-month Share Price Chart

![Share Price Chart](chart.png)
Witwatersrand Basin and the Pilbara

Witwatersrand Basin
- Worlds biggest gold deposits
- Produced over 40% of all gold

Pilbara conglomerate hosted gold
- The gold rush of the 21st century
- An exciting new province
Gold Deposits of the Central Rand

- Central Rand Goldfield has produced over 247Moz and is still producing
- WWI’s Project
  - Produced 41Moz at ~5g/t
  - Still significant areas of virgin ground, untouched by previous mining
  - Expansive open pit opportunities
Significant increase in WBP JORC resource

- Gold discovered in 1886
- Over 41 Moz produced from six conglomerate reefs
- Global Mineral Resource Estimate = 3.26 Moz Au
- Over 75% of Au in Measured and Indicated
- Historic resource was 12.8 Moz Au*
- DRD ceased mining operations in June 2000

* (ASX Release 6 Dec 2017)

Gold production at Kimberley Central Open Pit

- Project commenced under government directive (June 2017)
- Mining Kimberley Reef
- Contract mining
- Toll treatment
- 12-15 month project life

### Average Monthly Production for Sept – May

<table>
<thead>
<tr>
<th>Description</th>
<th>Value</th>

</tr>
<tr>
<td>Net Cash Proceeds(^1) (AUD)</td>
<td>160,000</td>
</tr>
</tbody>
</table>

\(^1\) - After split with JV Partner
As of May 2018, the WBP remained on a self-sustaining footing:

- Monthly production now averages >15kt ore (~1.8g/t Au) from Kimberley Central Open Pit prospect.
- Project delivering free cash flow since November 2017 to fund ongoing development.
- Current resource at Kimberley Central Open Pit sufficient to sustain production for next 8-10 months.
- 17 identified targets for both open-pit and underground development.
Open pit targets

- **Kimberley Central Open Pit** was the first mining within the area since 2000
- Two additional Mining Permits are now sought
- Next opportunities

1. **Main & South Central Open Pit**
   - Main and South Reefs
   - High-grade basal reefs
   - Published exploration target
     - 150 – 200Kt @ 5 – 7 g/t for 25,000 – 40,000oz Au

2. **Kimberley West Open Pit**
Mine planning

- **Rho Gold Underground**: 2.2km strike M&S
- **6.0 km strike B&W**: Kimberley Underground
- **4.0 km strike Kimberley**: DRD
WBP - Route to Increased Production

- Open Pit Mining Commenced
- Resource Upgrade + 1.9Moz
- Mining Right Application
- JORC Resource Update
- Mining Permit Granted - M&S Central
- Mining Permit Granted - Kimberley West
- Mining Right Granted

Timeline:
- June 2017
- December 2017
- March 2018
- April 2018
- June 2018
- August 2018
- September 2018
- November 2018
- Q2 2019

Delivering Free Cash Flow
Two Mining Permit Applications
JORC Resource Update
Mining Permit Granted - Kimberley West
Mining Right Granted
Historic geology: Pilbara and Kapvaal

- Pilbara and Kapvaal Cratons were amalgamated as part of Archean Proto Continent.
- Similar geologic histories
- Witwatersrand Gold deposits created in sedimentary basins
- Potential in Pilbara to find similar undiscovered conglomerate hosted gold deposits
- The diagram shows a possible interp of the Vaalbara cratons during Archaean (Cheney 1996)
• Australia has been experiencing a 21\textsuperscript{st} century gold rush

• Australian projects show similarity to the famous Witwatersrand gold deposits

• WWI has secured two exploration opportunities:
  • Tambina Mining Licences
  • Mt Cecelia project
Tambina has three GRANTED mining licenses:

- Substantial exploration database acquired – drilling, geophysics, sampling
- Sampling identified laterally continuous gold bearing conglomerates
- Area of mapped conglomerates, 1,600m north-south by 350m east-west
- Mapping and sampling commenced onsite in April
- Introduction of small scale mining being assessed
Mt Cecelia: Prospective address

- Mt Cecelia project area pending granting
- Conglomerates of the Lower Fortescue mapped
- Good access due to Telfer Gas pipeline
- Exploration planning underway:
  - Mapping to confirm Hardey Group
  - Detailed mapping and sampling to identify prospective conglomerate horizons
  - Geophysics to identify structure and locate Mt Roe Basalt equivalent

Source: Company data
Key takeaways

• Strategic transformation to become a mid-tier gold producer with operations in the Witwatersrand Basin and Pilbara

• Self-sustaining **Witwatersrand Basin Project:**
  • Ongoing production;
  • Grow resource; and
  • Securing mining rights

• Leveraging the geology team’s Witwatersrand Basin experience, rapidly understand the geology of the two Pilbara assets

• **Tambina** – exploration program defined on already documented gold bearing conglomerates

• **Mt Cecelia** – awaiting grant of licence – reconnaissance geology/prospecting planned

• WWI is significantly undervalued especially factoring in its Witwatersrand Basin asset
Board and Management

**Michael Quinert**
Executive Chairman
Board Since: April 2007
- More than 30 years as a commercial lawyer, including three years with the Australian Securities Exchange Ltd and >20 years as a partner in a Melbourne law firm
- Extensive experience in assisting and advising public companies on capital raises and market compliance issues with significant experience within the resources sector

**Hulme Scholes**
Non-Executive Director
Board Since: March 2011
- Began his career as a junior official at Harmony Gold in 1980’s and has since become one of South Africa’s top legal minds specialising in mining / mineral law for over 20 years
- Currently a senior partner at Malan Scholes Attorneys in Johannesburg and commercial director at Aquarius Platinum’s operating subsidiary

**Daniel (Niel) Pretorius**
Non-Executive Director
Board Since: August 2007
- Over 15 years experience within the mining industry
- Appointed CEO of DRD Gold Limited in 2009

**Vincent Savage**
Non-Executive Director
Board Since: October 2011
- Over 35 years experience in the building and mining industries, coupled with >20 years working within the insolvency and business advisory sectors
- Joined the Board as part of the Derewo acquisition – responsible for developing this asset as well as working closely to resolve any governmental and regulatory issues

**Dr. Andrew Tunks**
Exploration Director
Commenced: March 2018
- Dr Tunks has been a geologist for 30 years, with a particular emphasis on gold throughout his career
- Previously held CEO / Director positions at several Australian gold and resource groups
